

WEAR
of
MATERIALS
1985

edited by
K.C. LUDEMA

CONTENTS

PART ONE: CERAMICS

Erosion and Strength Degradation in Alumina <i>J. E. Ritter, L. Rosenfeld, and K. Jakus</i>	1
Friction and Wear of Zirconia at Very Low Sliding Speeds <i>H. G. Scott</i>	8
Friction and Wear of Hot Pressed Silicon Nitride and Other Ceramics <i>H. Ishigaki, I. Kawaguchi, M. Iwasa, and Y. Toibana</i>	13
Interaction of Tribochemistry and Microfracture in the Friction and Wear of Silicon Nitride <i>T. E. Fischer and H. Tomizawa</i>	22
Wear Resistance of TiB ₂ -Fe Cermets <i>B. Champagne and S. Dallaire</i>	33
Binder Extrusion in Sliding Wear of WC-Co Alloys <i>J. Larsen-Basse</i>	39

PART TWO: METALS-I

Abrasive Wear of Two-Phase Metallic Materials With a Coarse Microstructure <i>K. H. Zum Gahr</i>	45
A Comparison of Carbide Fracture During Fixed Depth and Fixed Load Scratch Tests <i>S. V. Prasad and T. H. Kosel</i>	59
Wear and Galling Resistance of Intermetallic-Strengthened Iron-Base Hardfacing Alloys <i>E. K. Ohriner and E. P. Whelan</i>	67
Correlating Alloy Composition to Wear in Low-Alloy Steels <i>J. H. Tylczak</i>	73
The Fretting Wear of Steel Ropes in Seawater – The Effect of Cathodic Protection <i>B. R. Pearson and R. B. Waterhouse</i>	79
The "Airferrograph" – A Device for Separating Wear Debris From Abrasives for Analysis <i>Y. Zhongying, Z. Pingan, and J. Zhanmin</i>	88

PART THREE: WEAR OF DEVICES-I

Effect of Fretting on the Contact Resistance of Copper, Aluminum, and Nickel-Coated Aluminum Wire Connections <i>M. Braunovic</i>	96
Influence of Lubrication in the Wear Characteristics of Roller Chains <i>H. Peeken and W. Coenen</i>	105
Influence of Fretting Wear on the Fatigue of Power Transmission Chains <i>Y. Kin</i>	114
Crankshaft Surfaces: Finishing Methods, Surface Characterization, and Their Influence on Wear <i>W. J. Whitney, Jr. and B. E. Schwab</i>	121
Comparison of Chase and Inertial Brake Dynamometer Testing of Automotive Friction Materials <i>P. H. S. Tsang, M. G. Jacko, and S. K. Rhee</i>	129
Wear Failure Analysis of Shot-Blaster Blades and the Influence of Alloy Microstructures <i>J. S. Sun</i>	138
Laboratory and Field Testing of Wear-Resistant Composites <i>B. Champagne and R. Angers</i>	142
A New Contribution to Predictive Approach of Cylinder Liner Wear Process <i>T. Mathia, J. M. Schissler, and J. Saverna</i>	149

PART FOUR: METALS-II

Sliding Wear of 304 and 310 Stainless Steels <i>Z. Y. Yang, M. G. S. Naylor and D. A. Rigney</i>	155
Wear-Corrosion of Steels Under Cyclic Operation in Corrosive Liquid Environment <i>S. Bhattacharyya, V. S. Agarwala, and K. Y. Kim</i>	162

The Effect of Initial Orientation on the Formation of Tribological Textures and on the Wear Behavior of the Regions in the Proximity of Surface Layers Under Continuous Sliding Motion in Tribological Systems <i>H. Krause and E. Ocalan</i>	173
The Influence of Silicon Content on the Wear Characteristics of Hypereutectic Al-Si Alloys <i>J. B. Andrews, M. V. Seneviratne, K. P. Zier, and T. R. Jett</i>	180
Wear of Ledeburitic Chromium Steels <i>H. Berns and W. Trojahn</i>	186
Friction and Wear of Eutectoid and Hypoeutectoid Steels <i>D. Shen</i>	194
Friction-Induced Martensite in Austenitic Fe-Mn-C Steels <i>N. Jost and I. Schmidt</i>	205
The Wear Resistance and Worn Metallography of Pearlite, Bainite and Tempered Martensite Rail Steel Microstructures of High Hardness <i>J. Kalousek, D. M. Fegredo, and E. E. Laufer</i>	212
PART FIVE: FUNDAMENTALS-I	
The Shape of Adhesive Wear Particles <i>E. Rabinowicz</i>	232
The Relationship of Tangential Stress to Wear Particle Formation Mechanisms <i>S. Jahanmir</i>	238
Prediction of Debris Flake Thickness <i>J. Don and D. A. Rigney</i>	248
Wear in Rolling Contacts <i>A. V. Oliver, H. A. Spikes, P. B. MacPherson</i>	254
The Role of Near-Surface Plastic Deformation in the Wear of Lamellar Solids <i>F. E. Kennedy, L. A. Hartman, K. E. Hauck, and V. A. Surprenant</i>	273
The "Breaking-In" of Lubricated Surfaces <i>S. C. Kang and K. C. Ludema</i>	280
On the Thermal Aspect of Fretting Wear-Temperature Measurement in the Subsurface Layer <i>M. H. Attia and P. Ko</i>	287
Galling Wear of Metals <i>M. B. Peterson, K. J. Bhansali, E. P. Whintont, and L. K. Ives</i>	293
Surface Effects of Corrosive Media on Hardness, Friction, and Wear of Materials <i>K. Miyoshi, D. H. Buckley, G. W. P. Rengstorff, and H. Ishigaki</i>	302
PART SIX: ABRASION-I	
Comparison of Several Types of Abrasive Wear Tests <i>R. Blickensderfer, B. W. Madsen, and J. H. Tylczak</i>	313
Mechanisms of Gouging Abrasive Wear of Steel, Investigated With the Aid of Pendulum Single Pass Grooving <i>U. Bryggman, S. Hogmark, and O. Vingsbo</i>	324
The Influence of Atmospheric Humidity on the Abrasive Wear of Metals <i>A. P. Mercer and I. M. Hutchings</i>	332
Some Aspects of Abrasive Wear at Elevated Temperatures <i>S. Soemantri, A. C. McGee and I. Finnie</i>	338
A Study of Parameters Using a New Constant-Wear-Rate Slurry Test <i>B. W. Madsen</i>	345
Effect of Solid Additives on Wear by Greases Containing Abrasive Particles <i>L. K. Ives and M. B. Peterson</i>	355
An X-Ray Diffraction and TEM Study of Subsurface Recovery During Abrasion <i>C. M. Rao and T. H. Kosel</i>	364

PART SEVEN: COATINGS

Comparison of Wear Properties of Electroless Nickel, Hard Chromium and Carbonitrided Surfaces <i>A. J. O'Donnel</i>	373
The Effect of Phosphorous Content and Heat Treatment on the Wear Resistance of Electroless Deposited Ni-P Alloys <i>G. Lu, G. Li, F. Yu</i>	382
Electro-Spark Deposition—A Technique for Producing Wear Resistant Coatings <i>G. L. Sheldon and R. N. Johnson</i>	388

PART EIGHT: POLYMERS

Effect of Counterface Roughness on the Friction and Wear of Polyterafluoroethylene and Polyethylene <i>K. Tanaka and T. Nagai</i>	397
The Load-Dependence of Fatigue Wear in Polymers <i>A. G. Atkins and M. K. Omar</i>	405
Wear Behaviour of Two Parts Subjected to 'Gouging' Abrasion, <i>Y-J. Liu, N-P. Chen, Z-R. Zhang, and C-Q. Yang</i>	410
Friction Induced Vibrations and Subsurface Melting of Nylon <i>P. H. Vroegop and R. Bosma</i>	416

PART NINE: FUNDAMENTALS-I

An Application of Thermal Wave Microscopy to Research on the Sliding Wear Break-in Behavior of a Tarnished Cu-15 wt%Zn Alloy <i>P. J. Blau and C. D. Olson</i>	424
The Dependence of Wear Rate on Sliding Velocity and Sliding Distance for Dry Cu/Fe and Ni/Fe <i>T. Sasada and S. Norose</i>	432
Transfer During Unlubricated Sliding Wear of Selected Metal Systems <i>L. H. Chen and D. A. Rigney</i>	437
Impact Wear of Elastomers <i>R. G. Bayer</i>	447
Flash Temperatures Due to Friction and Joule Heat at Asperity Contacts <i>D. Kuhlmann-Wilsdorf</i>	456
Dislocation Density and Cell Structure Produced in the Subsurface Layer of Aluminium During Sliding Wear <i>K. Kato, T. Kayaba, and Y. Ono</i>	463
The Effect of Ion Implantation on the Fretting Wear of Four Titanium Alloys at Temperatures up to 600° C <i>R. B. Waterhouse and A. Iwabuchi</i>	471
Description of Wear of Materials With Isotropic and Anisotropic Microstructures <i>E. Hornbogen</i>	477
Sclerometric Investigations of Nearly Brittle Materials <i>T. G. Mathia and B. Lamy</i>	485

PART TEN: WEAR OF DEVICES-II

A Model for Wear of Conical Coal Mining Bits <i>P. K. Mehrotra</i>	491
Metal Removal Mechanisms Comprising Wear in Mineral Processing <i>D. J. Dunn</i>	501
Corrosive and Abrasive Wear in Ore Grinding <i>I. Iwasaki, K. A. Natarajan, S. C. Riemer, and J. N. Orlich</i>	509
Comparison of Laboratory and Field Abrasion Tests <i>P. A. Swanson</i>	519
The Role of Sand Particles on the Rapid Destruction of the Cavitation Zone of Hydraulic Turbines <i>H. Jin, F. Zheng, S. Li, and C. Hung</i>	526

Wear Tests of Low-Cobalt Alloys for Hardfacing Nuclear Components <i>H. Ocken</i>	529
Wear Characteristics of Various Hard Materials for Machining SiC Reinforced Aluminum Alloy <i>M. K. Brun, M. Lee, and F. Gorsler</i>	539
PART ELEVEN: METALS-III	
Direct Observation of the Wear of Copper <i>J. S. Sheasby, G. R. Mount, and J. E. Elder</i>	545
Adhesion of Copper Alloys <i>J. V. Reid and J. A. Schey</i>	550
Corrosive Wear Synergy of Alloy and Stainless Steel <i>W. Schumacher</i>	558
Impact Wear of Iron Rich Superalloys <i>S. F. Wayne, H. Nowotny, and S. L. Rice</i>	567
Effect of Retained Austenite on Rolling Element Fatigue and Its Mechanisms <i>D. Zhu, F. Wang, Q. Cai, M. Zheng, and Y. Cheng</i>	572
The Oxidational and Tribological Behavior of Austenitic Stainless Steels Under a CO ₂ -Based Environment <i>T. F. J. Quinn and L. R. Wallace</i>	578
Effect of Microstructure and Mechanical Properties on the Erosion of 18 Ni (250) Maraging Steel <i>M. Naim and S. Bahadur</i>	586
PART TWELVE: ABRASION-II	
Factors Affecting Abrasion Resistance of Commercial Hardfacing Alloys <i>F. Borik and J. C. Majetich</i>	595
Abrasion Resistance of Annealed Tool Steels <i>K. G. Budinski</i>	605
Microstructure-Abrasive Wear Characteristics of Low Carbon Dual Phase Steels <i>C. K. Kwok and G. Thomas</i>	612
An Investigation of Abrasive Wear Resistance of Unidirectionally Solidified High Chromium Iron. <i>J-Y. Su, Q-D. Zhou, and Y-D. Jia</i>	621
Abrasive Wear Resistance and Microstructure of Fe-Cr-C-B Hard Surfacing Weld Deposits <i>H. Berns and A. Fischer</i>	625
Relations Between Microstructure and Wear Resistance of White Cast-Irons (28% CR) for the Low-Speed Transport of Abrasive Materials <i>A. Royer, J. M. Schissler, P. Camelin, S. Vasseur, and J. Saverna</i>	634
Influence of Precipitation and Solution Strengthening on Abrasive Wear Resistance <i>S. Soderberg, U. Bryggman, and A. Canales</i>	645
PART THIRTEEN: EROSION	
Analysis of Interlaboratory Test Results of Solid Particle Impingement Erosion <i>A. W. Ruff</i>	654
Effect of Microstructure on the Erosion of Steel by Solid Particles <i>L. G. Peterson, G. A. Sargent, and H. Conrad</i>	661
Wear of Alloy Steels in Silica Sand Slurry <i>Q. -L. Wang and P. -E. Xu</i>	671
Erosion of White Cast Irons and Stellite <i>S. S. Aptekar and T. H. Kossel</i>	677
Solid-Particle Erosion of Mullite <i>C. T. Morrison, J. L. Routbort, and R. O. Scattergood</i>	687
Erosive Wear of Ductile Ordered Alloys <i>B. J. Marquardt, D. M. Baker, and J. J. Wert</i>	693

Erosion of Corrosion-Resistant Surface Treatments on Alloy Steels <i>A. Levy and G. Hickey</i>	699
Elevated Temperature Erosion of Steels <i>A. V. Levy, J. Yan, and J. Patterson</i>	708
PART FOURTEEN: COMPOSITES	
Tribological Studies on Rubber Modified Epoxies: Influence of Material Properties and Operating Conditions <i>N. S. Eiss, Jr. and H. Czichos</i>	717
The Friction and Wear of Poly(Tetrafluoroethylene)-Poly(Etheretherketone) Composites; an Initial Appraisal of the Optimum Composition <i>B. J. Briscoe, L. H. Yao, and T. A. Stolarski</i>	725
The Wear Behavior of Short-Fiber Reinforced Thermoplastics Sliding Against Smooth Steel Surfaces <i>H. Voss and K. Friedrich</i>	742
Performance of Polymer Composites Under Wear Loading <i>K. Friedrich</i>	751
The Wear and High Temperature Resistance of Polymeric Brake Composites <i>K-C. Gong, Y-C. Zheng, and Y-Y. Huang</i>	765
The Effect of Unidirectional Cotton Fiber Reinforcement on the Friction and Wear Characteristics of Polyester <i>A. M. Eleiche and G. M. Amin</i>	771
Friction and Wear of Two Component Composite Coatings Produced by Thermal Spraying <i>A. Sandt</i>	777
Friction and Wear of Particle-Reinforced Metal-Ceramic Composites <i>N. Saka and D. P. Karalekas</i>	784
